

SYNTERYS

Your partner for custom medicinal chemistry solutions

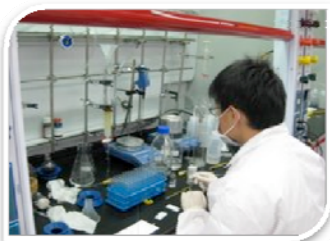

Who we are – We are a synthetic medicinal chemistry service provider serving the needs of outsourced chemistry efforts. We are a highly experienced team of synthetic chemists with a proven track record of success. We provide a full array of medicinal chemistry capabilities to accelerate your R&D programs.

Advantages – With our decades of experience in the pharmaceutical and biotechnology industry, we provide an experienced and focused team dedicated to your success. We offer a flexible outsourcing model, with U.S.-based management and laboratories coupled to a mirror site in Taiwan to provide cost flexibility.

Services – Our team has expertise in a wide array of difficult chemistries and we provide a full array of synthetic and medicinal chemistry capabilities. In addition to the rapid turnaround of synthetic intermediates and final compounds, we specialize in hit-seeking, hit-to-lead and lead optimization chemistry campaigns. We also offer supplementary services in IT, ADME/PK and process development.

Capabilities - We have fully operational facilities in the U.S. and Taiwan. Both facilities are fully equipped with the entire infrastructure needed to rapidly complete projects including NMR, LC/MS, HPLCs, ISCO Chromatography, and microwave reactors.
